

DAN-Board plain boards

PLAIN FOR PRODUCTS AND CONSTRUCTION

DAN-Board Plain is a solid plastic plate with a smooth surface and base. The product is made from recycled plastic and is available in LDPE.

In addition to what we normally have in stock and consider our standard plates, we also offer custom-made plates by request. The customer decides the size and color of the plates. Furthermore, we can offer the possibility of logos milled into the plate.

It is only the imagination that sets the limits for how exactly your plastic sheets should be made.

The plastic sheets can be processed by the usual mechanical and thermal processes, they can be the following

- Cut
- Sawed
- Drilled
- Planed
- Milled
- Screwed
- Heat shaped
- Welded

DAN-Board Ground protection mats

HIGH QUALITY WITH A GREENER PERSPECTIVE

DAN-Board Ground protection mats are stable boards made of 100% recycled plastic with many possible applications.

The product is used in many industries as a road plate or bottom plate, because they withstand high loads are resistant to liquids and chemicals.

Our mats are easy to handle, and therefore suitable for a wide range of use cases, such as:

- Building board for stable building and other industries
- Wear plates
- Root protection
- Flooring & floor protection
- Grass protection
- Driving plates
- A great and healthier alternative to heavy steel plates.

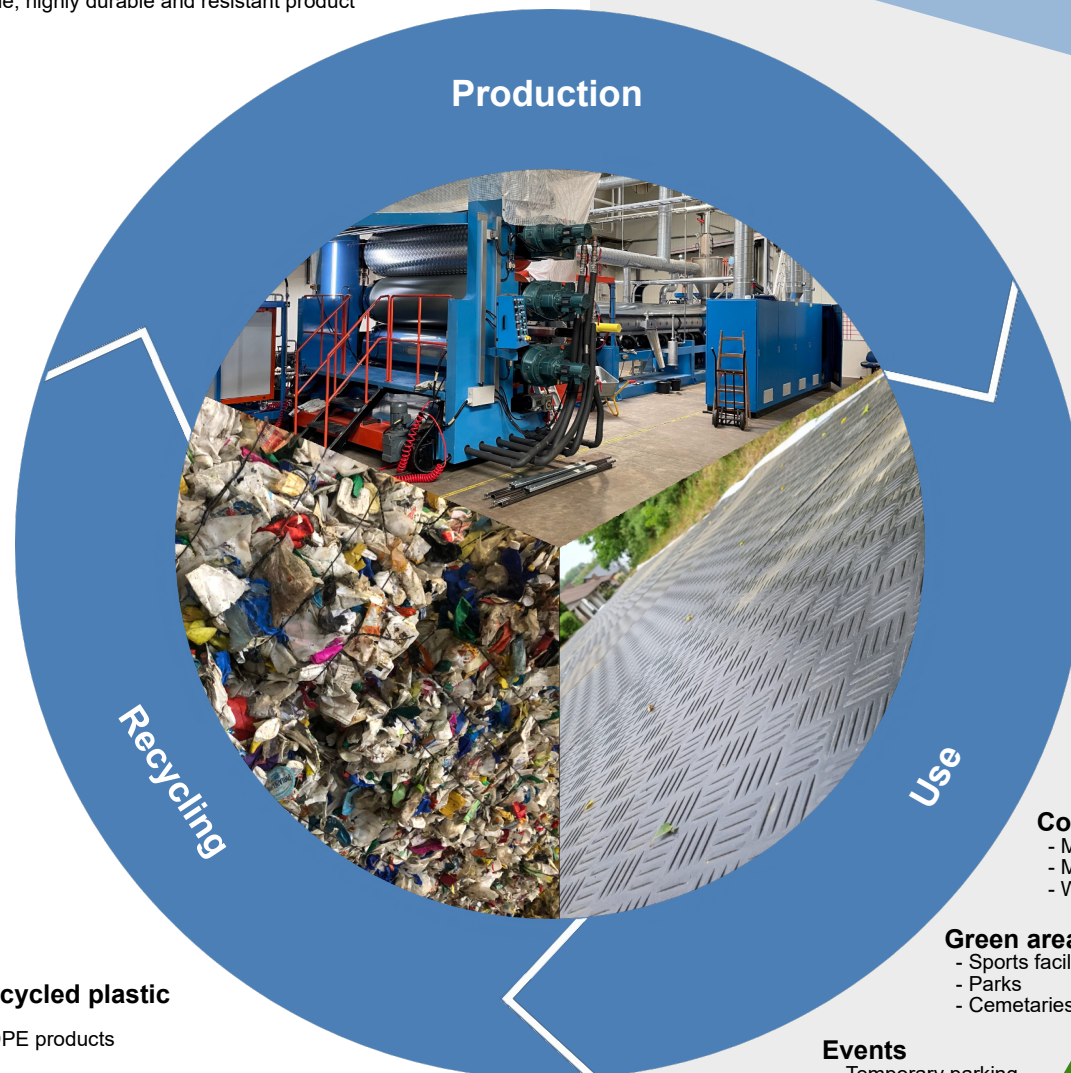

There are many more usages for our DAN-Board Ground protection mats, its all down to ones imagination.
