

Handle Connector

DAN-Board Handle Connector

Our handle connector in stainless steel offers a convenient solution for connecting ground protection mats on **even substrates**. With this connector, the process of connecting the mats becomes much easier and more efficient.

One of the key advantages of the connector is its versatility. Our small version is designed to fit boards ranging from **8 mm to 15 mm** in thickness and our large to fit boards ranging from **15 mm to 22 mm**. This means that regardless of the thickness of the ground protection mats you have, the connector will be compatible with **our handles** and allow for a secure connection.

The stainless steel construction of the connector ensures durability and strength. Stainless steel is known for its corrosion resistance, making it suitable for outdoor applications where the mats are commonly used. It provides a **reliable** and **long-lasting** connection between the mats, ensuring stability and safety.

For boards with:

- **4 handles (h4)** you will need **4 connectors**.
- **2 handles (h2)** you will need **2 connectors**.

Product numbers

nr.: **0103** - 23 mm Handle connector for 8 - 15 mm

nr.: **0104** - 32 mm Handle connector for 15 - 22 mm
